

The future of online corporate travel booking, SABSCorporate will revolutionise the way corporate travellers book online.

“Many people claim leading edge technology in their sales patter, often the words are a cliché and the reality is somewhat different. The team at MICROS have truly delivered a product that is not only leading edge but is one that will turn heads in the commercial travel market.”

Ian Wotton, RedfernTravel

SABSCorporate takes online corporate travel booking to the next level. The system’s unique design consolidates all of your preferred GDS, Rail, Hotel and Taxi providers into one simple to use web-based self-booking tool.

In order to give the end user all the information required to make the most cost effective reservation, the unique holistic costing facility calculates:

**Fares + fees + applicable rebates + CO₂ + manhour costs
= most cost effective reservation**

The intelligent packaging facility then searches all suppliers and dynamically packages together the most cost effective flight or train, hotel and taxi whilst taking into consideration corporate policy, carbon cost, man-hour cost & corporate governance.

Single sign on access, search and book

- Best price identification
- Rail multi ticket type searches
- Off peak rail travel promotion
- Closest hotel-to-office search
- Corporate travel policy enforcement
- True “holistic” trip cost overview
- Linked expense management
- Linked group and conference event booking
- Online conferencing
- Inclusive MIS reporting

Coupled with MICROS Travel’s process and ticketing automation systems, you really can achieve a true “touchless” booking-to-fulfilment process.
